Please give Microsoft the punishment it deserves and quit letting this giant ignore laws. It is a true monopoly and we as americans should have more than one choice when it comes to computer operating systems.

Wouldn't you just hate it if there were only Fords with two models to choose from and no options offered that would fit on a Ford. We have hundreds of cars and models to choose from with an astronomical choice of options to put on these cars.

Please stop Microsoft so we can have a choice, they do not have anyone who has any imagination. They stifle the competition so they end up broke then they buy there ideas at a bankrupt price. Then use their ideas as if it were they who had the vision and skill to design such programs and the have the gall to put their Microsoft name on it.

Our country is in a sad state morally and economically when we always let the one with the most money win!!!!!!!!!!

They copied Apple's graphical interface back in the late 80's and got away with it and now they want a open door policy to the education market because they have been a bad!!!

May anyone who condons monopolistic behavior and encourages its survival - rot in hell! Yes I'm mad - that our government has let Microsoft waste our tax paying money on it monopolistic practices and is still wasting our money trying to satisfy this giants wishes when we should be spanking it ass for being a bad example to the rest the business world.

The government is supposed protect the people from such practices in a free enterprise society - may you only have a FORD to drive and have only WHITE BREAD for your choice of food.

The U.S. DOJ is the only one that can protect us from Microsoft - so just Do It!!!!!!!!!!

That is why we the people elected you to your current position - WE THE PEOPLE - not Microsoft the Monopoly! We the people pay your wages and we the people need your support!!!!

Or can't you spank the hand that funds your political goals?????????????
